

Enterprise Migration to Amazon OpenSearch

Global Financial Services Company

CHALLENGE

- ⊕ Client's text searching / IT logging and monitoring capabilities needed to be in regulatory compliance
- ⊕ Existing provider's (Elastic Search) capabilities and roadmap posed concern and risk.
- ⊕ Client needed support migrating from existing provider to new provider (Amazon OpenSearch)

SOLUTION

- ⊕ Led multi-function team in deploying full Amazon OpenSearch functionality
- ⊕ Designed, built, and deployed architecture with Kaizen Agile process
- ⊕ Integrated critical application to the Amazon OpenSearch Service
- ⊕ Migrated the existing Kibana dashboards to Amazon OpenSearch dashboards

RESULTS

- ⊕ Delivered fully-integrated Amazon OpenSearch solution in 11 weeks
- ⊕ Successfully created the integration with key enterprise applications, with the ability to efficiently aggregate, observe, visualize, analyze, and report on logs
- ⊕ Patched the distributions to comply with the overall enterprise security standards
