

Data-Driven Quality, Cost, and Compliance Management System

A Holistic Approach that Integrates Manufacturing, R&D, and Compliance to Unlock Enterprise Value

Kaizen's experience-based framework incorporates Manufacturing, R&D, and Compliance data sources and metrics within an integrated program to help **speed up solution development timelines**. The framework includes a range of components for **data ETL/ELT processes, AI/ML algorithms, API frameworks, visualization components, plug-ins to low-code UI toolkits, and Digital Traceability**. Project team members can quickly deliver solutions that enable users to make critical business decisions through the discovery, analysis, comparison, prediction, and reporting of relevant information. With years of experience in data-driven solutions for automotive, manufacturing, and industrial clients, **our frameworks ensure higher quality solutions** through proper management and coordination, compliance with relevant regulations and standards, and an all-encompassing approach to solution development.

Kaizen's Unique Value:

1. Deep experience in financial systems & metrics to drive value-based scenario planning on adoption/investment in PLM platforms
2. Leverage decades of industry SME expertise and assessment frameworks to streamline migration to PLM platforms
3. Avoiding "Survivor Bias" and targeting literal truths when combing through large volume datasets

"Integrating and understanding data at an impressive speed, your team's talent and collaboration across boundaries have enabled the creation of **high-quality reporting systems**, allowing the Compliance group to **access crucial numbers** and **swiftly devise change plans for production and sourcing** to meet compliance requirements."

- VP, Corporate Risk and Compliance

SOLUTION

- ✓ Contextual data driven insights that allow for expert guidance and intervention
- ✓ Frameworks for purpose built data hub and self service analytics
- ✓ Efficient use of existing technology stack
- ✓ Targeted use of modern technology and toolkits
- ✓ Prioritize delivery on value realization

BENEFITS

- ✓ Faster integration to client's financial systems & industry focused financial metrics
- ✓ Augment current data engineering and analytical solutions
- ✓ Minimize data movement across systems
- ✓ Speed deployment timeline with accelerators and domain expertise
- ✓ Experts in low-code deployment for exec friendly user interface and reporting layers
- ✓ Affordable and scalable solution frameworks
- ✓ Deliver greater value through Digital Traceability by integrating all data sources together across various value chains

Kaizen is a leading provider of Data, Analytics, and Technology services and solutions. We combine our subject matter expertise with our cloud platform to rapidly uncover actionable insights and generate incremental profit across the value chain. Recognized by Gartner, NPR, Forbes, Entrepreneur, and Inc. 5000, we are a certified minority-owned business headquartered in Atlanta, with offices in other major US cities and a global offshore team.
